

JLG Forklift Parts

Following retirement in the late 1960's, John L. Grove started on a cross country RV voyage. After spending many years establishing his family built crane business with his brother, John had no idea that this journey would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road expedition.

Whilst on their journey, John spent time talking to previous business associates whom the Groves stopped to visit along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John uncovered a vast marketplace for a product that could swiftly and securely lift people in the air to accomplish upkeep and other construction functions.

Upon returning from their travels, John formed a partnership with two friends and acquired a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty personnel, they designed and sold the first JLG aerial work platform. The company incorporates some of the simple design elements of that original lift into existing designs.

JLG forklifts have come a ways from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. At present, the business proudly continues to expand itself into a range of markets worldwide and develops new products to make sure clients are capable of being more effective and perform in the workplace within a safer environment.
